Job role : AWS Java developer

Experience : 7-9yrs

Location : Remote Opportunity

Job description :

Your day-to-day

You will focus on delivering high quality solution using your Java and Kotlin skills

You Will Work As part of an agile team, planning, refining, delivering and inspecting sprint deliveries

You work closely with product and design to understand context and vision

You Will work with your peers across teams to make platform improvements and increase learning opportunities for all in a supportive environment

What do you need to bring

Today we work with technologies like:

Java and Kotlin

Dropwizard, Spring Boot

Docker, Terraform

PostgreSQL

AWS

Everything is hosted on Amazon Web Services – we use managed cloud services as much as we can.

We believe that you have:

- 6 to 8 years of experience in software development
- 5+ years of experience building distributed systems
- 5 + years of experience with SQL and data modeling
- Experience working with continuously delivered systems
- A result and delivery-oriented mindset
- A genuine learning and knowledge sharing spirit
- Unix/Linux/Docker experience
- Interest in or experience of FinTech industry
