## Job Description

---

**Experience :** 7-9yrs

### Job description :

As an senior software engineer in our team, you will contribute not only to all aspects of backend, but also get involved in all aspects of software engineering: infra, data, application, deployment, monitoring, architecture, code reviews, pair and mob programming, etc.

You will also be leading a few initiatives with your design and architectural know-how and working in collaboration with other Architects and Managers.

Here, we own everything we do: we own our successes as well as our mistakes and setbacks.

In this spirit, we are looking for someone reliable, curious, and bold. You're at ease with sharing your knowledge, experience, and opinions, but also appreciate input from your peers.
