Job Description

Experience: 8+yrs

Job description:

Have 5+ years of hands-on coding experience, strong expertise in Angular 16+ versions (this is a migration project from an older version to a new Angular version) and leading Angular web application development projects for clients. (so strong communication skills is must to drive client conversions)

Have expertise working on Figma and have developed complex UI elements.

Are immediately available to start the role.

Are comfortable with a contractual role for 6 months, with the possibility of extension.

Can lead projects independently, take ownership, and drive success with minimal supervision.

Holds a bachelor's degree in software engineering

About the Role:

As part of our tech team, you'll work on next-gen cloud-based pricing platforms, defining UX standards, building reusable component libraries, and ensuring scalability and resilience.

Key Requirements:

Strong expertise in Angular 16+, UI testing frameworks (Jest, Cypress, Playwright), and cloud platforms (AWS, ECS, Docker).

Proven experience in building cloud-enabled apps with 12-factor design, CI/CD pipelines (Jenkins), and microservices.

Hands-on experience in UI/UX design, defining common component libraries, and integrating micro-frontends.

Ability to mentor junior engineers while working within an agile, collaborative environment.

Familiarity with building shareable web components and documenting using Storybook is a plus

Strong analytical, communication, and organisational skills with a user-focused approach.

Share the updated resume that includes various angular projects you have worked on to date. It must have scope, duration, version, role, and deliverables that should include complex UI elements developed.
