Job Description

Role - Security tester - Full time.
Experience - Lead - 6+ years & ATA - 9+ years

Security testing - Key Responsibilities:

Security Testing:

- 1. Conduct regular penetration tests across web, mobile, and API applications to identify vulnerabilities.
- 2. Perform manual and automated security testing based on OWASP standards.
- 3. Test for vulnerabilities such as SQL Injection, XSS, CSRF, and other OWASP Top 10 risks.

Threat Identification & Mitigation:

- 1. Continuously monitor systems for potential threats and vulnerabilities.
- 2. Respond to and act on security alerts in real-time to mitigate risks.
- 3. Implement proactive measures to safeguard against emerging threats.

Collaboration and Education:

- 1. Partner with DevOps, development, and infrastructure teams to integrate security into the Software Development Lifecycle (SDLC).
- 2. Provide guidance and training to internal teams on security best practices and awareness.
- 3. Report findings and recommendations to stakeholders in a clear and actionable format.

Tool Management and Automation:

- 1. Use tools such as Burp Suite, Nessus, Metasploit, OWASP ZAP, and other security testing solutions.
- 2. Automate repetitive security testing tasks for scalability and efficiency.
- 3. Stay updated on emerging security tools and trends to enhance the organization's capabilities.

Reporting and Documentation:

- 1. Document security incidents, testing results, and remediation actions.
- 2. Create comprehensive reports for technical and non-technical stakeholders, highlighting risks and recommendations.

Technical Skills:

- 1. Expertise in SQL Injection testing, XSS, and vulnerability assessment techniques.
- 2. Familiarity with scripting languages (Python, Bash, PowerShell) and their use in security automation.
- 3. Proficiency with network security concepts, firewalls, IDS/IPS, and cloud security (AWS, Azure, GCP).
