Job Description

Experience : 4-6yrs

Job Description:

We are seeking a highly skilled Senior Software Engineer with expertise in Java, Spring Boot, and Python to join our team. The ideal candidate will have a strong background in developing large-scale applications and building highly scalable, automated systems with low latency and high availability. In this role, you will collaborate with engineering teams to deliver innovative solutions and ensure high performance and reliability in our systems.

Must-Have Skills:

- 4+ years of experience in developing large-scale applications with Java and Spring Boot.
- Proven experience in designing highly scalable automated systems with low latency and high availability.
- Strong knowledge of Python, SQL, Unix/Linux, Git, Jira, and Service Now.
- Familiarity with Tableau and experience in troubleshooting and debugging complex multi-tier applications.

Good-to-Have Skills:

- Expertise in online payments and related domains.
- Hands-on experience in online payment systems or related financial services.

Top 3 Skills:

1. Core Java and OOP
2. Spring Boot
3. Python

Responsibilities:

- Design and develop highly scalable, automated systems to ensure low latency and high availability.
- Collaborate with engineering teams on various projects, ensuring smooth integration and alignment with business goals.
- Provide technical troubleshooting and debugging expertise to resolve complex issues in multi-tier applications.
- Demonstrate strong problem-solving skills and enthusiasm for continuous learning and innovation.
