Deadline : Jan 01, 1970
Published : Sep 21, 2024
Employment Status : Full Time
Experience : 3 - <5 Years
Salary :
Gender : Any
Career Level : Any
Qualification : B.Tech

Job Description

Experience : 3-8yrs
Job description :
Must have skills :
• Min 3 to 8+ yrs of strong experience in UI Development.
• Good proficiency in front-end technologies like React, HTML, CSS, and JavaScript
• Good Testing Framework experience in Cypress and JEST
Requirements :
• 8+ years of proficiency in front-end technologies like React, HTML, CSS, and JavaScript.
• They should have a solid understanding of responsive design and cross-browser compatibility.
• Frontend Engineers must be detail-oriented and strive for pixel-perfect designs.
• They should be able to implement designs provided by UX/UI designers accurately, paying close attention to typography, layout, and color. Accessibility, responsive design and performance are table stakes during development.
• Problem-solving and critical thinking: Frontend Engineers should be able to solve problems and think critically about the design and functionality of the user interface.
• They should be able to break down complex problems into smaller parts and find solutions to them.
• They should also be able to anticipate potential issues and come up with solutions to prevent them from occurring. Communication and soft skills: Engineer should be able to work with different stakeholders (product manager, tech leads, and UX), and able to articulate the requirements and their work.
• Engineer should be flexible while working with team and initiatives
